

Professor Fishy McMittens
I want to learn to LaTeX like a superhero.
My fave color is def purple.

I want to teleport to Budapest.

Proof. Budapest is great because it is actually two cities: Buda and Pest (well, it used to be anyway).

It is also great because you can use the slogan 'Pest City Ever' if you both (a), live on the Pest side and (b), speak English better than Hungarian. \square

Some math is: $5 + 5 = 10$ or $1^0 = 1$ or $\frac{1}{2} - \frac{1}{2} = 0$.

I like to type math in this Budapest. Some more math is:

$$4 \times 4 = 16$$

$$11 + 1 = 12$$

$$4 + 4 = 8$$

I want to:

- Go to Szechenyi Bath.
- Ride the Sziget Eye.
- Drink 'Csak Jo Sor.' :)

Three of the BEST things about this place are:

1. Public transit.
 - (a) Buses + Trams + Metro
 - (b) The YELLOW LINE is so old and wonderful.
2. 'Wet air', not rain
3. Tall ceilings.

I loved my time in Bp and would love to teleport back just for a day.
